Ismail Asseida

Southfield College, Shomolu Lagos, Nigeria

Participated: 1 year

Future Plans: The desire to serve humanity and save lives has propelled my choice of future ambition.

Growing up in an environment like Africa whereby people are been deprived of good health facilities and also health care contributed to the profession I have chosen.

I would be glad enough if I could study in your amiable country to have sound education, access to good facilities and laboratory, diversities in culture and learn from best practitioners.

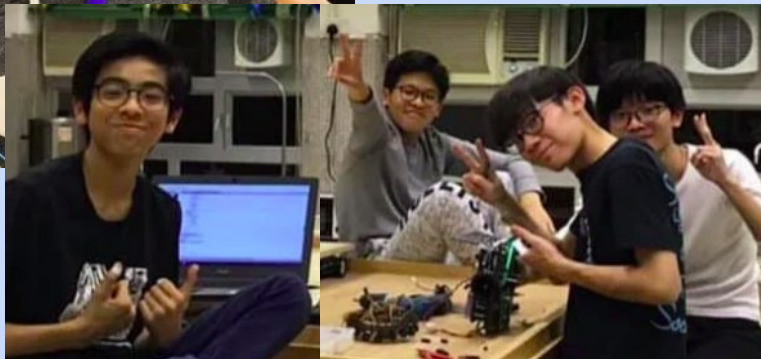

Chung Ho Chun Norris

Cheung Sha Wan Catholic Secondary School,
Hong Kong

Participated: 2 years

Future Plans: I hope to advance my study
on engineering in university. I wish I can
become the next HackSmith and open a
company investigating electronic gadgets.

Chara Doughty

Homeschool, Clearwater, FL

Participated: 6 years

Future Plans: to major in electrical engineering at Pensacola Christian College. After that, I plan to get a job at either NASA or SpaceX and ultimately become an astronaut.

Melody Denby

Hartland High School, Hartland, MI

Participated: 3 years

Future Plans: I am going to be attending Kettering University with a major in computer science. I have an internship with KUHMUTE, a company that creates universal charging for micromobility, where I will be a Full Stack Developer! C:. I would never have found interest in KUHMUTE if it weren't for the experience Robofest has given me.

Isabella “Izzy” Ford

Napoleon High School, Napoleon, MI

Participated: 3 years

Future Plans: **to attend Jackson College**
majoring in Psychology with hopes of
being a therapist.

Emelife Franklin

Southfield College, Lagos, Nigeria

Participated: 1 year

Future Plans: As a final year student of Southfield college, being in junior secondary school 3 on planning to write my final examination, with junior secondary certificate examination, I plan for the following in future.

In another three years I will be writing my west African examination council, test of English as a foreign language, joint admission matriculation board to qualify for admission into tertiary institution abroad. I will want to become an architect and study at Michigan University.

Elsi Himmelman

Shelburne Regional High School, Shelburne,
Nova Scotia

Participated: 2 years

Future Plans: **Bachelor of Arts in
Psychology at Acadia University**

Emerson Li

Cranbrook Kingswood School, Bloomfield Hills, MI

Participated: 6 years

Future Plans: **Attend Columbia University - Engineering School**

Nathaniel Okine

Opoku Ware School, Kumasi, Ghana

Participated: 1 year

Future Plans: Learn Automobile Engineering at LTU and hopefully start my own Automobiles Company and compete in the car market against The Ford's and the Chevrolet's

Elizabeth Phelps

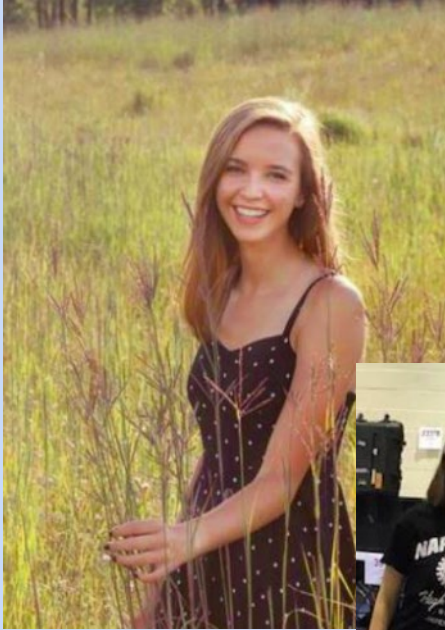

Napoleon High School, Napoleon, MI

Participated: 3 Years

Future Plans: I will be attending Michigan State University majoring in Bioengineering and hope to become a pediatrician

Mackenzie Pulka

Napoleon High School, Napoleon, MI

Participated: 1 year

Future Plans: **Michigan Technological University** next year, majoring in **Mechanical Engineering**

Pranav Rakkappan

Northville High School, Northville, MI

Participated: 5 Years

Future Plans: I plan to major in Computer Science at Michigan State University College of Engineering in the fall, as I am very passionate about technology and programming.

I wish to work at a large, innovative tech company like Tesla or Rivian. My goal is to work on something big that everyone uses like adaptive cruise control. I am thinking of going into the autonomous / electric vehicles field because autonomous vehicles are like a more advanced version of our robots from the Robofest competitions.

Paige Roden

Napoleon High School, Napoleon, MI

Participated: 3 years

Future Plans: **attending Western Michigan University to get a degree in engineering**

Sin Wing Leung Peter

Cheung Sha Wan Catholic Secondary School,
Hong Kong

Participated: 2 years

Future Plans: I want to be a computer engineer in the future. I had participated in different robotics competitions in secondary school life and I learnt a lot about programming as well as got a lot friends. I was a student with no friends before joining the robotics team. Robofest had really changed me a lot as I found my interest. So I decide to study in MIT..

Gabrielle Tallant

Hazel Park High School, Hazel Park, MI

Participated: 4 years

Future Plans: **Go to community college for 2 years then transfer to complete a bachelor's for an engineering related degree, likely in robotics or mechanical.**

Steven Wang

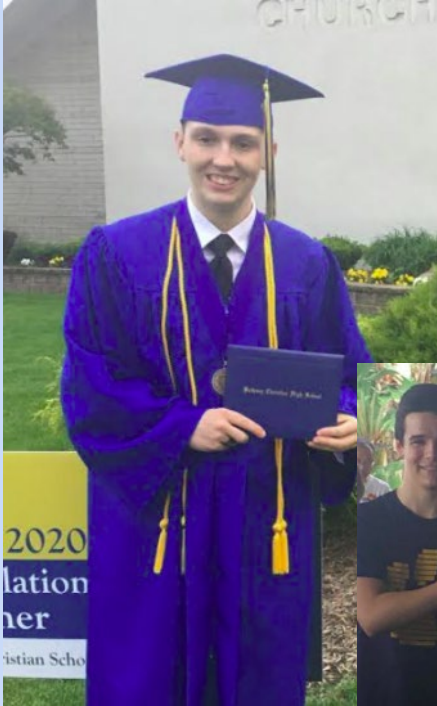

Cranbrook Schools, Bloomfield Hills, MI

Participated: 5 years

Future Plans: **Attend Harvard in the fall**

Todd Ward

Bethany Christian School, Troy, MI

Participated: 6 years

Future Plans: **Attending Bob Jones
University in Greenville, SC
Majoring in Pre -Physical Therapy**

Raymond Weatherwax

Napoleon High School, Napoleon, MI

Participated: 3 years

Future Plans: **to work in a machine shop**

Callis Wong

The International School of Macau

Participated: 1 Year

Future Plans: **Medical school in Macau**

Thank you all for participating in Robofest.

Congratulations for your achievements and best of luck
in your future endeavors.
